

## INFO PACK

### long term volunteer Project in Castelo de Vide, Portugal

**10 MONTHS IN 2024**

Dear participants,

JOGRAIS AUDAZES is a non profit organization based in a little village in a rural area of North Alentejo. The main aim of the organization is to promote and empower the development of the person and of the local/regional community through education, non formal learning, training and international cooperation. Culture, communication and sustainable development are, also, very important for us.

Through the following pages, we have gathered the information you need to know about our Hosting ESC Project and about your stay in Castelo de Vide.

## **Project Information:**

### **ONLINE YOUTH RADIO PROJECT**

The main component of our project will have to do directly with the regular operation of our "Rádio Intencional, online youth radio"

Volunteers will support the normal schedule of programs, in the technical area, and will help with outdoor work, whether recording or live.

They can propose the creation of author programs that can be included in the program schedule.

Volunteers will support the organization of different activities that the association will organize and implement, such as concerts, workshops, living libraries, board game afternoons and other cultural, social and even sporting activities.

The volunteers will spend the first month understanding the concept and developing the Portuguese linguistic competences.

The working time will be around 30 hours/week adjusted with the needs of the project. The volunteers will receive a "pocket money" which will be paid each week or month according to the wish of the participants.

## **Practical Issues:**

### **Tips for travelling**

The participants can search for flights to Lisbon airport. From there we will manage to bring them to Castelo de Vide.

### **Meals**

Volunteers will have a budget to buy the food and they prepare the meals together or they can eat in a canteen. Something to decide in the beginning of their stay.

### **Internet and phone:**

Participants have the possibility to use internet for free at the house. Phone reception in and around the house is good.

### **Accommodation:**

The volunteers will live all together in a lovely house in Castelo de Vide. For four volunteers there are two single rooms and one double room. Bedsheets are provided. In the house you can find washing machine.

Here you can discover the village of Castelo de Vide:
